

Laya: The AI Operating System

A cadence for professional orchestration.

Unifying events, research, and action into a single harmonious flow.

The Philosophy of Flow

Laya eliminates the friction between notification and resolution.

From Silos to Synapses

The modern professional is trapped in "App Fragmentation."
Laya acts as a central nervous system, connecting isolated tools via n8n.

-  400+ Native Connectors
-  Event-Driven Intelligence
-  Multi-Agent Orchestration

The Multi-Persona Brain

Engineering

Listen for bugs, analyze codebases via MCP, and stage Pull Requests automatically.

Sales & CRM

Identify leads, research company news, and draft hyper-personalized outreach.

HR & Ops

Orchestrate onboarding, provision access, and summarize team sentiment pulses.

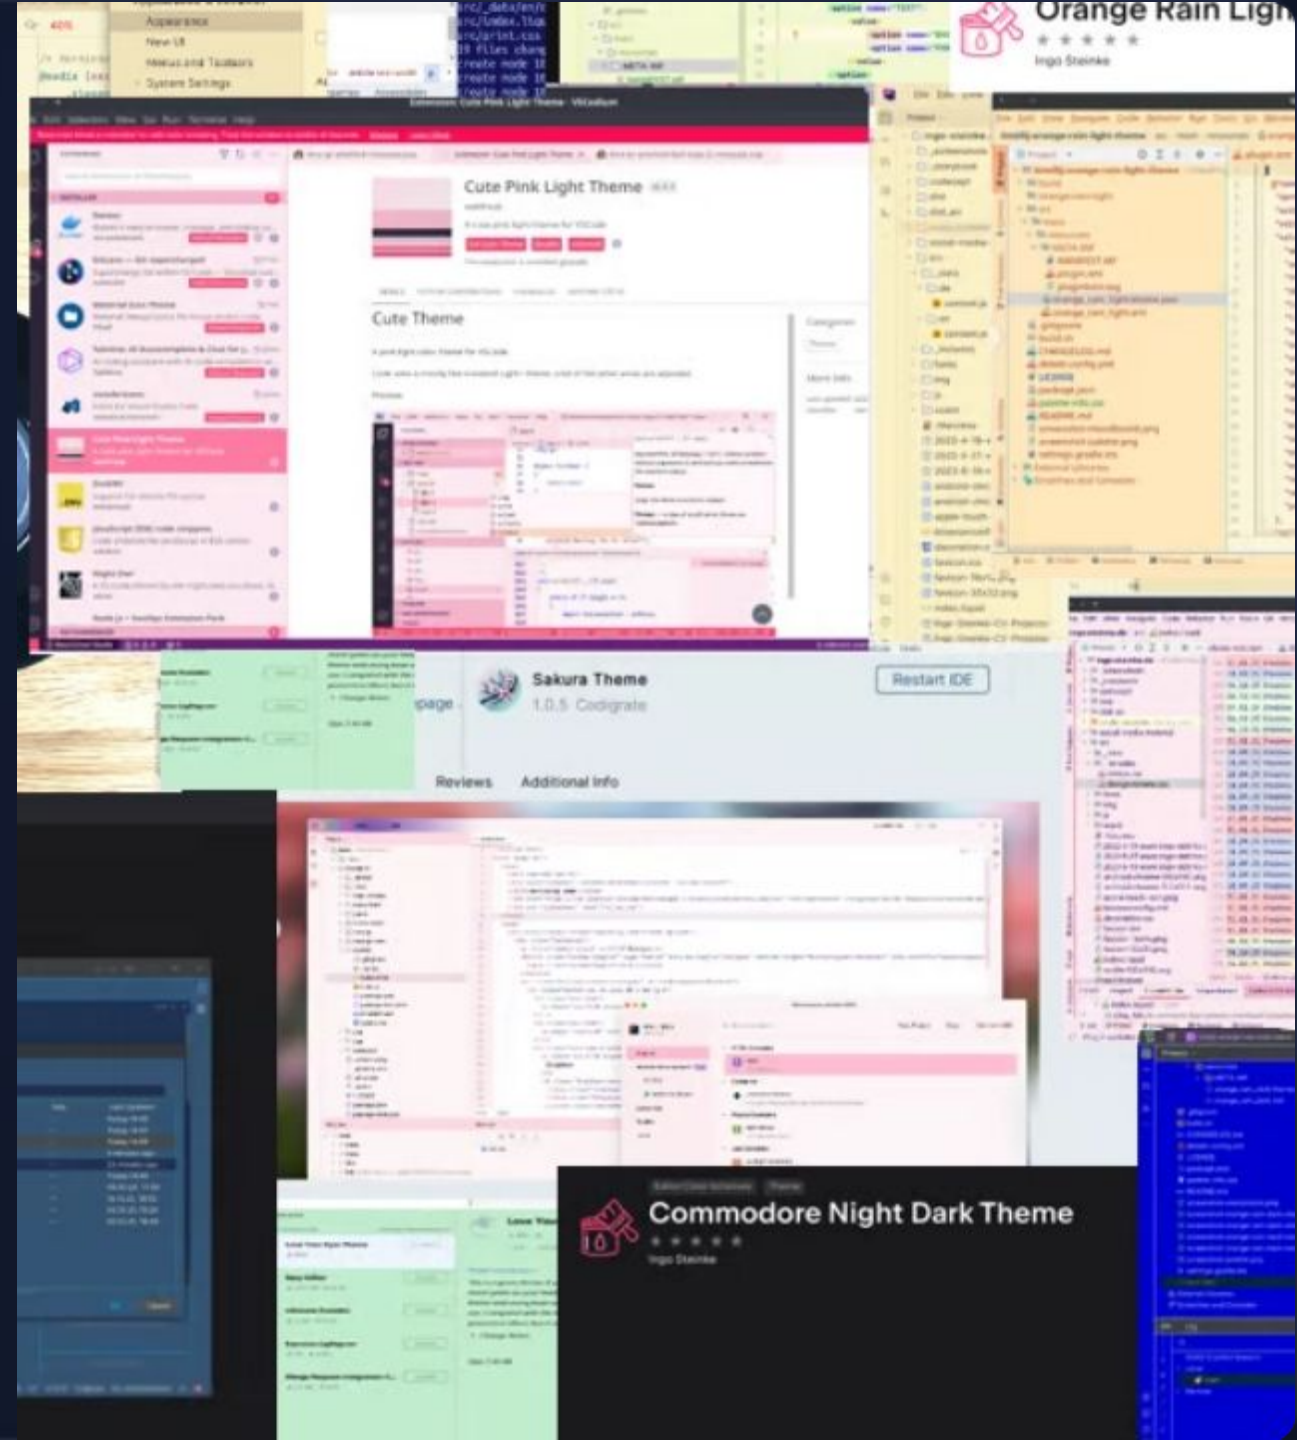

Finance

Track spend spikes, draft dispute emails, and audit invoices with AI precision.

Engineering: Autonomous Staging

Laya's "Engineer Persona" intercepts Jira tickets and PagerDuty alerts. It performs deep codebase research using Model Context Protocol (MCP) tools. The result is a "Ready-to-Commit" staged fix, presenting the user with a high-fidelity code diff rather than a cryptic notification.

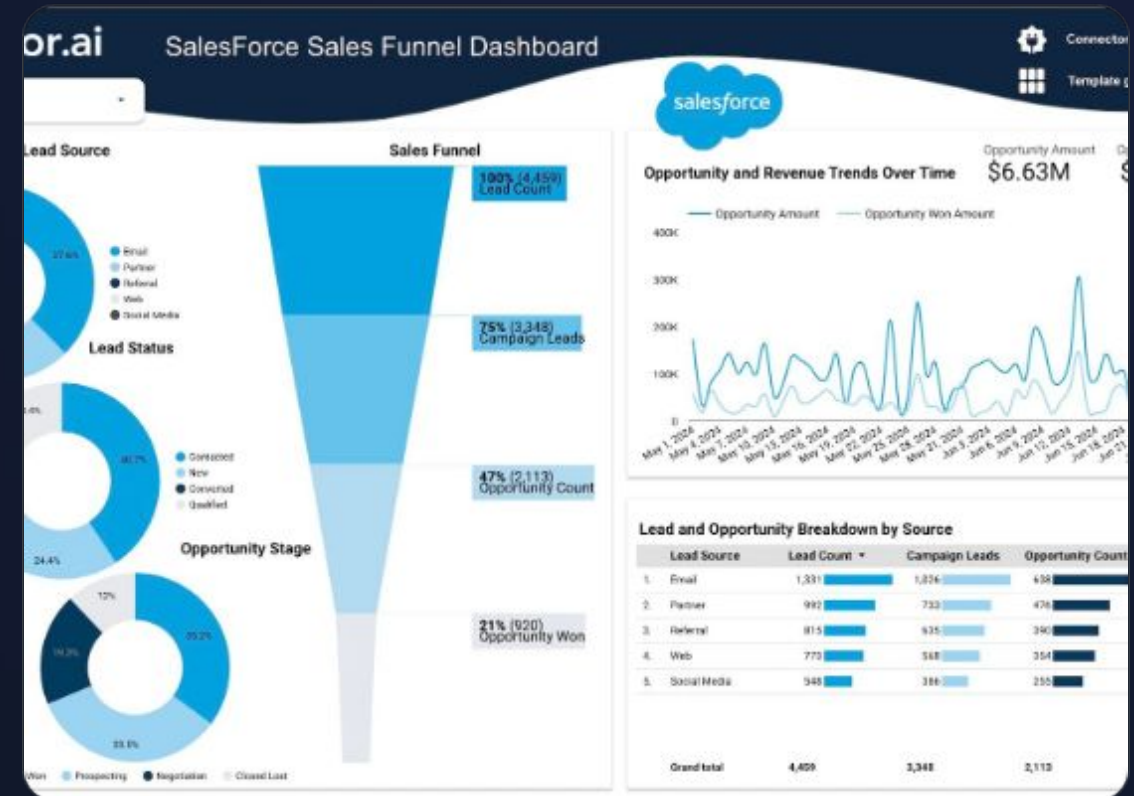

Sales: Precision Intelligence

The Intelligence-First CRM

When a lead enters Salesforce, Laya assumes the "Sales Expert" persona. It crawls LinkedIn, company news, and past interactions to find the "Warm Angle."

Instead of manual research, the user is presented with a curated intelligence brief and a drafted outreach email.

HR: Frictionless People Ops

Automated Onboarding

Triggered by a signed contract in Greenhouse, Laya provisions Slack seats, creates Jira accounts, and drafts the internal announcement for the team.

Sentiment Monitoring

Analyze Slack pulse surveys and Lattice feedback. Laya alerts managers to potential churn risks before they manifest in resignations.

Finance: Spend Stewardship

92%

Audit Accuracy

Real-time Fiscal Control

Laya monitors AWS cost spikes and NetSuite budget deviations. It cross-references spend with project milestones to flag anomalies immediately.

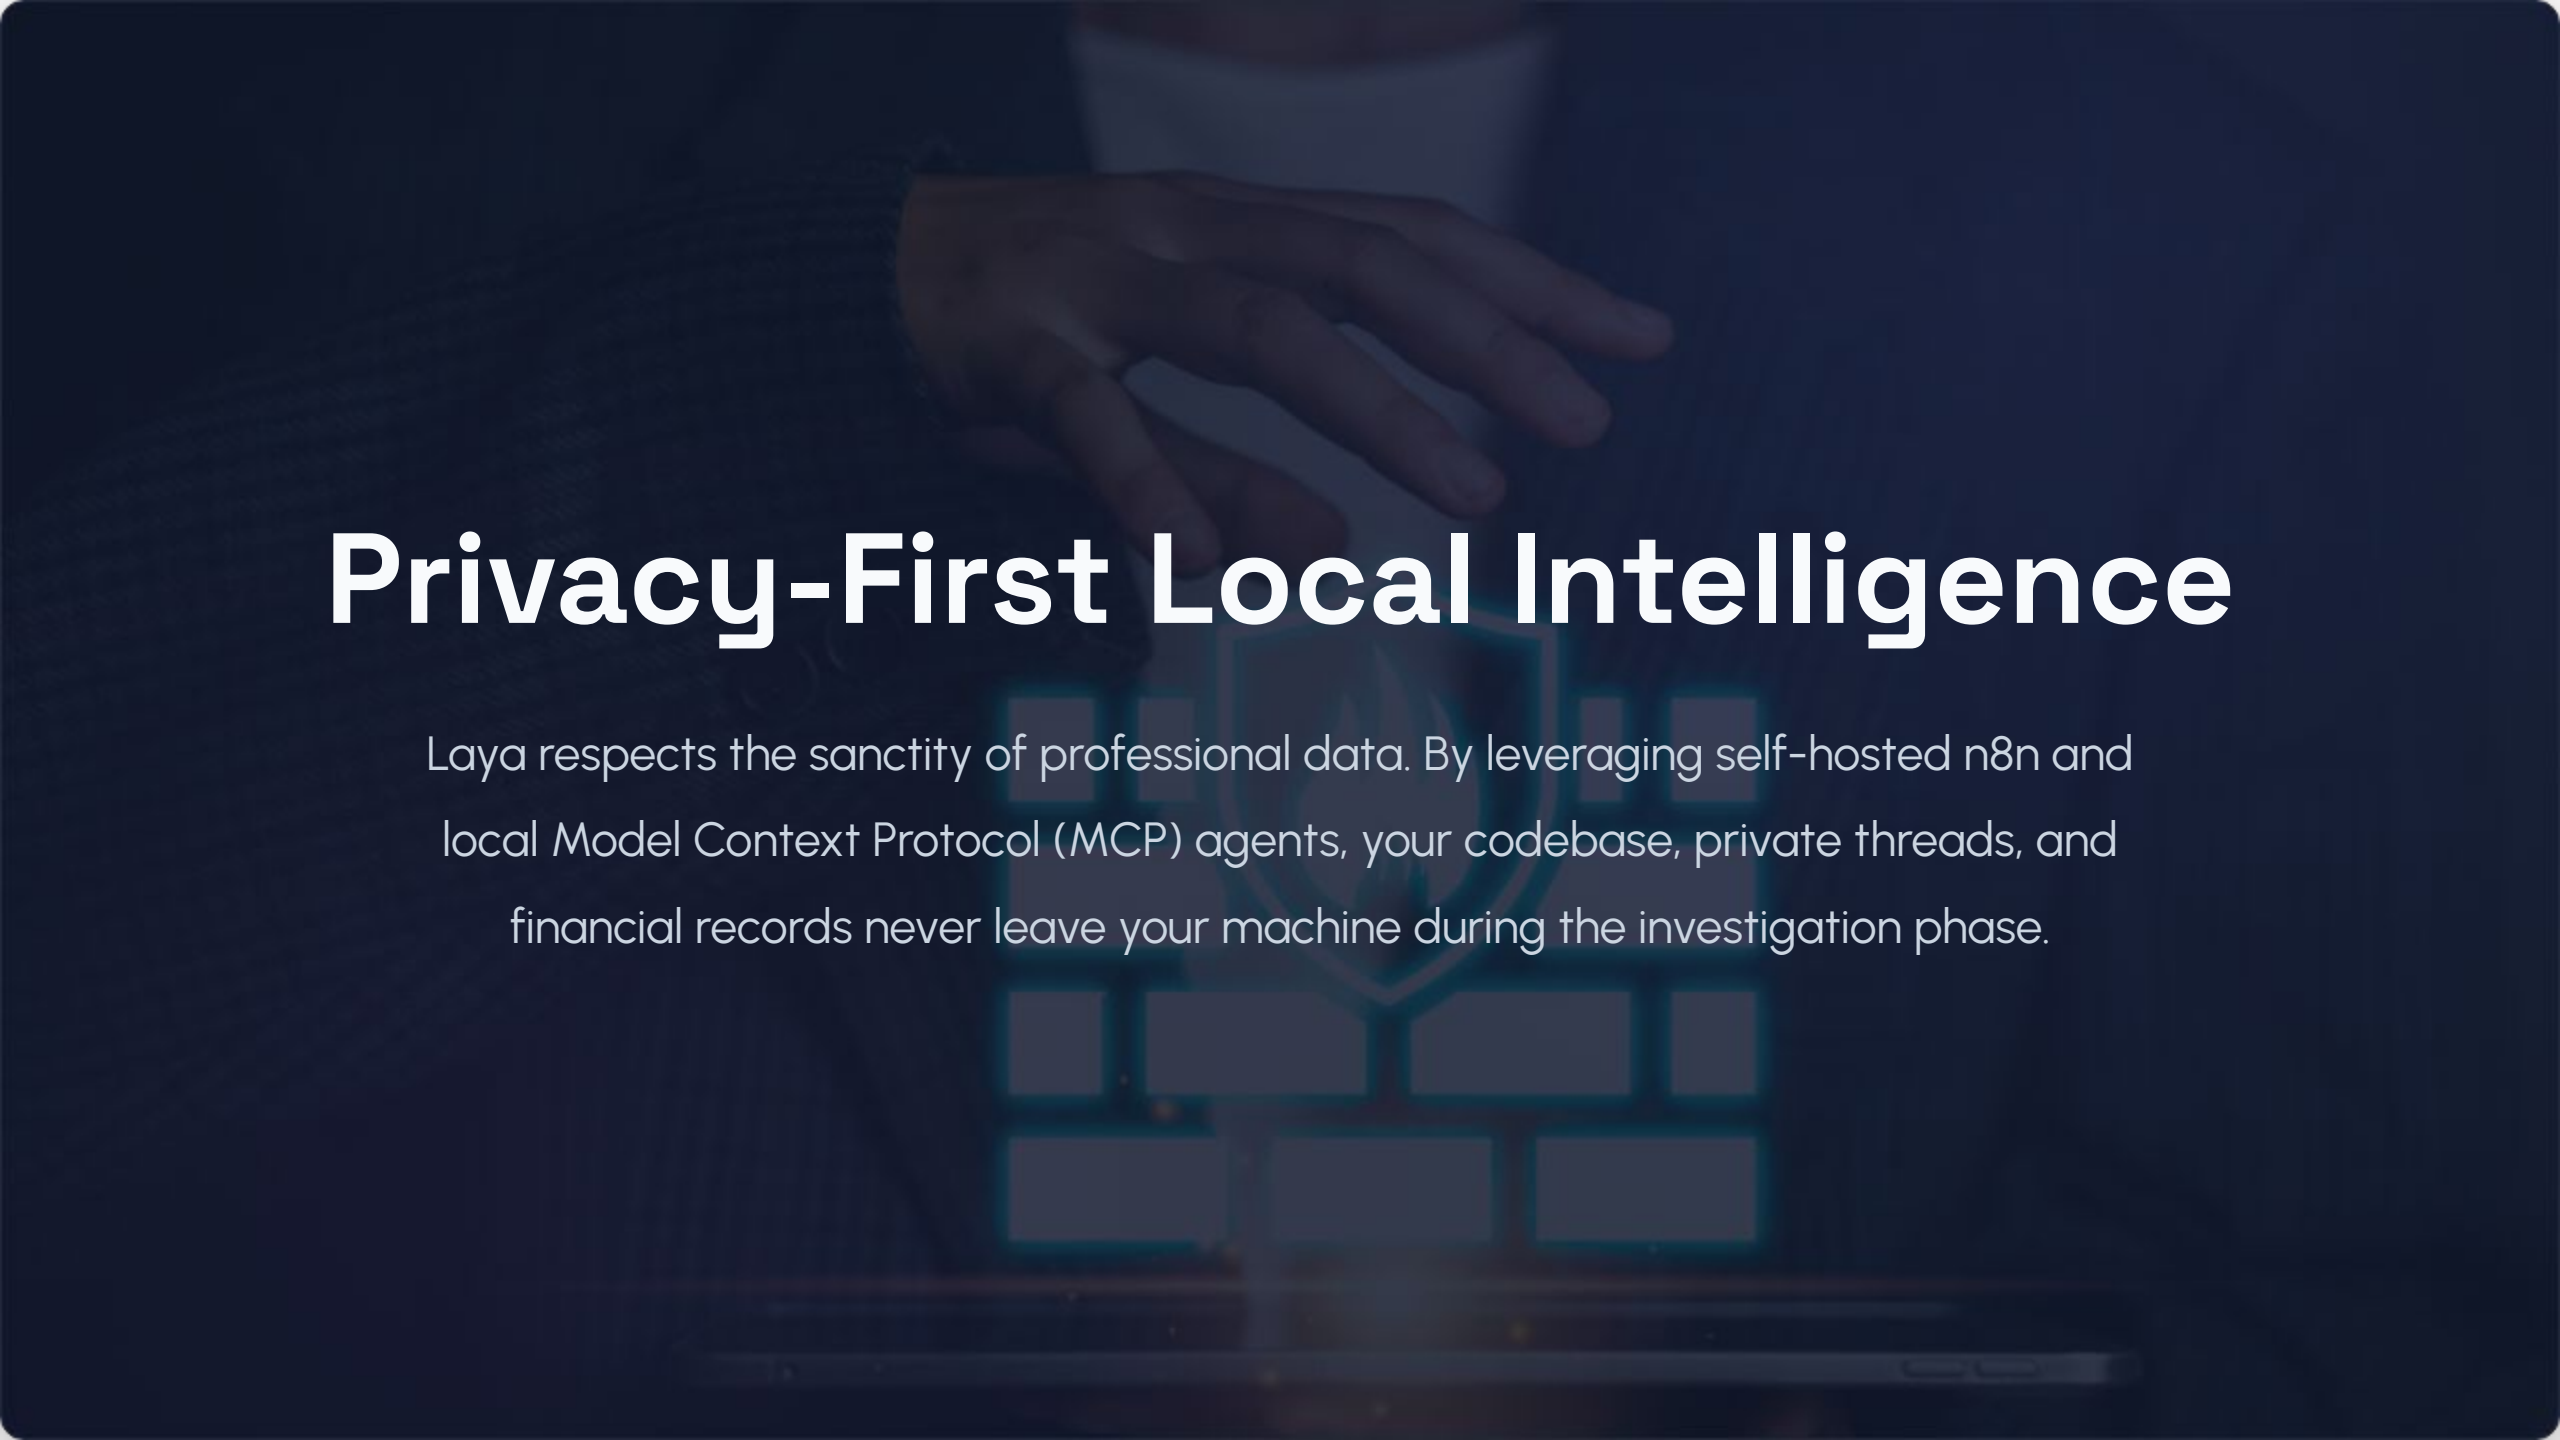

Automate the "Chase": Draft invoice dispute emails and vendor follow-ups without manual data entry.

The Efficiency Delta

Workflow	Standard Manual	Laya Orchestrated
Bug Resolution	90 Mins (Research, Fix, PR)	5 Mins (Review & Approve)
Lead Prospecting	20 Mins (LinkedIn, Research)	30 Seconds (Final Review)
New Hire Onboarding	45 Mins (Admin Tasks)	1 Min (Batch Approve)

Departmental Productivity Gains

A hand is shown hovering over a keyboard, with a shield icon visible on the screen. The background is dark blue with a subtle grid pattern.

Privacy-First Local Intelligence

Laya respects the sanctity of professional data. By leveraging self-hosted n8n and local Model Context Protocol (MCP) agents, your codebase, private threads, and financial records never leave your machine during the investigation phase.

Join the Rhythm

Experience the next evolution of professional work.
